

R12: Create a solid budget and upgrade plan in 5 DAYS!

Your need to upgrade is rapidly approaching, but you need a plan. SmartDog Services can help.

Other service providers may put you through the ringer with a lengthy discovery process that involves time-consuming and arduous interviews across your organization. Not SmartDog. We've created an automated diagnostic tool, the **R12 Upgrade Snapshot**, to take a picture of your system that gives you the information you need to understand the scope and complexity of your R12 upgrade in days, not weeks!

An upgrade plan and budget in 5 days*? How do you do it, SmartDog?

Having served the Oracle marketplace for more than two decades, we see the same needs over and over again. And, although no two businesses are the same, we've automated the discovery process to answer the majority of questions for you, proactively. What's left is to uncover the details that are specific to your business and presto! *You've got a plan.*

Here's how:

SmartDog Services runs our proprietary diagnostic tool to automatically extract critical, decision-making data from your system within minutes. Then, three key decision-making elements are provided that empower you to quickly analyze the state of your current system, evaluate its present use and assess its customizations.

Section 1: Environment Analysis – The starting point for your upgrade.

Section 2: Functional Foundation Analysis – The extent and complexity of your functional environment.

Section 3: The Customization Analysis – The level of customization and number of interfaces to other systems.

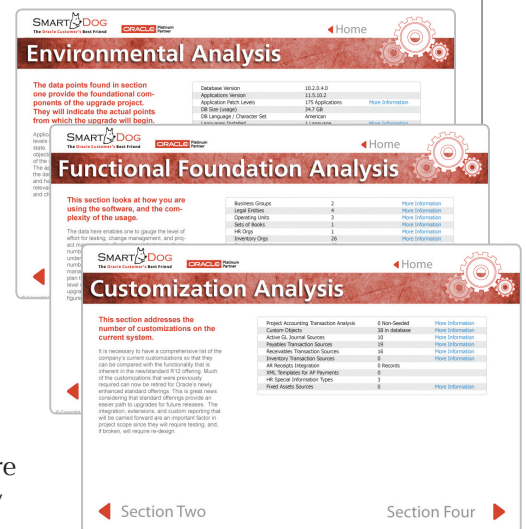

SmartDog Experts use this information to create a customized questionnaire that uncovers the details that pertain only to you. And finally, we interview your team to finalize the results.

With SmartDog it really is EASY to budget and plan for your R12 Upgrade!

SmartDog Services, www.smartdogservices.com, is the leading provider of consulting services for Oracle and is known in the marketplace as the "Oracle customer's best friend."

From full-scale implementations to ongoing support, companies benefit from our proprietary diagnostic tools which enable our experts to quickly identify improvement opportunities in the software and proactively implement these improvements.

Named SMB TOLA Partner of the Year by Oracle in 2010 for the fourth year in a row, SmartDog Services is an Oracle Platinum Partner. Visit our web site to see a full list of our awards and accolades and a sampling of customer endorsements.
